

Team tkIS India makes its presence felt

at Chemtech World Expo 2017

tkIS India made its presence felt at the recently-concluded Chemtech World Expo 2017, participating in the Refining, Petrochemicals & Polymers Conference. Our **MD & CEO Mr P D Samudra** shared the dias with Mr. B. K. Namdeo, former Director Refineries, HPCL & Convener of the Conference and Mr Vipul Shah, COO Petrochemicals, Reliance Industries Ltd at the Inaugural Session of the Conference.

Giving the Concluding Remarks of the Inaugural Session, Mr. Samudra presented the installed base of Refineries, Petrochemical and Polymer plants in India, a market overview and the present status of Euro IV and Euro VI norms in Indian Refineries. He concluded the Session with the hope that Capital Investments would take off in future supported by the upward trend in Oil prices. 'The ever-increasing demands augurs well for the Refining, Petrochemicals and Polymer Industry and should provide a boost to major production companies to setup new plants, as well as expand their existing capacities,' said Mr Samudra.

Team tkIS India makes its presence felt at Chemtech World Expo 2017

tkIS India was the Support Partner for Chemtech World Expo 2017.

Mr Prasad Khandalekar, Head of Process and TIS (SPC) presented our Hydrogen Technology in a Session on Refining Upgradation and Technology, where Mr. P. Padmanabhan, Managing Director, Numaligarh Refineries Ltd chaired the session.

Mr Khandalekar explained the need for additional Hydrogen in Refineries with the substantial demand for Energy and Clean Fuels, Government regulations for lighter and low-sulphur fuels and residue upgradation. 'Our Hydrogen Technology with its robust top-fired Steam Reformer Technology and Hydrogen plant design offers customers just the flexibility and customisation possibilities,' said Khandalekar.
