tkIS India's team comprising representatives from our Sales and Process teams presented the group's capabilities and experience at the Fertiliser Association of India (FAI)'s Symposium at Delhi earlier this month.

Widely regarded as the best forum for the Fertiliser Industry, the 3 day meet traditionally attracts the key decision makers from the leading fertiliser companies in the country. There is considerable presence from fertiliser companies from abroad as well.

A stall featuring the group's Nitrogenous and Phosphatic Fertiliser capabilities was the highlight of the presentation.
